

## Shoe Clinic Eskdale Krazy Kiwi 19 August 2012

### Results

A number of runners on the long course missed a sign turning the long course right of No8/Yogi onto No8. They carried on to the finish line, finishing some 5 kms short and with a faster time than would otherwise have been the case. We've had some emails questioning the results, and made some attempts to rectify the results. In the end, since we do not know all who ran off-course, we decided to leave the results as published. We do not want to get into any more discussions about the results. Please, just accept them for what they are now and be pleased with your performance, irrespective of what the results might indicate. You know if you followed the course or not. You know where you stand in the results.

We'll take some of the blame for the sign not being in direct line of vision. Please take on board the need to take stock of where you are and not keep going just because you think it's right. We placed signs at every decision point; basically any point you have to make a decision which way to go. That comes down to every track junction. That's why we briefed the need to check at junctions and not just keep going. That's why we briefed that if you came to a decision point and saw no signage then the chances were that something had been missed. At that point, turning around and going back to the last junction would have been the correct thing to do. On the long course that was probably around 400m from the bottom of the track where it came to the paddock.

We will take on board our failing and do what we can to minimise further the chances of runners going astray in the future.

Thank you for your support this year. We hope you will be back next year.

Louise and Philip
